Before the rule of adjustment takes place, Utah B commences with this arrangement—

and ends with the last verse number (34) on the mercy row.

At this point, Utah B fails to be a proper system because Moroni 10:34 does not end on either the kingdom or knowledge space.

The cutout from page 3 of Utah B shows the first adjustment in that system. First Nephi 10:14 occupies the knowledge cell. This verse number had been in the crown position of the following column, which verse number 15 now holds. The other numbers move up by one.

If 1 Nephi 10:14 were the only knowledge verse adjustment, Moroni 10:34 would end at the understanding cell instead of the mercy one.

Another adjustment does occur. This time we have 2 Nephi 3:12 on page 7 of Utah B moving to the knowledge cell. The other verse numbers move up again.

Please note that 2 Nephi 3:7—a knowledge verse—acts as just another verse number in the beauty cell.

The adjustment of 2 Nephi 3:12 enables Moroni 10:34 to advance up to the wisdom location from the understanding row.

The third adjustment takes place at 2 Nephi 21:9.

This movement allows Moroni 10:34 to go to the crown position. At this spot, Moroni 10:34 can be adjusted to the knowledge of the previous column, fulfilling the rule of endings. But, more adjustments are ahead.

The rule of endings requires that Moroni 10:34 must end on either the kingdom or the knowledge sefirah to legitimize a Tree-of-Life system.

Now possessing the crown cell, Moroni 10:34 will shift to the knowledge sefirah (cell). We see this final shift below.

All Utah and Missouri systems require the rule of endings. Most of these systems use the rule of adjustment to fulfill the criteria. In total, there are over a hundred systems. Could this all be a coincidence? What is the mathematical probability of all these coincidences? Could Joseph Smith do this or a small group of men? Doesn't it seem more likely the work of God?
